

COLLECTOR FEEDER

FOR IMMERSION OF COLLECTOR AND WATER PUMPS

MuoviTech's collector feeders handle single and double wound Ø32-50mm collector's. Fits casing 139,7mm and 168,3mm. The low weight facilitates the work so that one person can handle the work themselves and save time. Easy to handle and transport. By default, the collector feeder is supplied with powerful drive reels for collectors 2x40mm.

USE

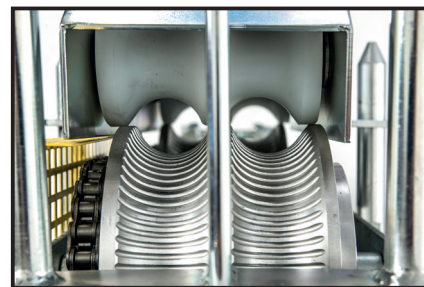

The collector feeder is designed for immersion and retrieval of collectors and water pumps.
